

# Free Educational Resources for Kids During Coronavirus Outbreak

## [PBS Kids](#)

For toddlers up to pre-k students, parents will love the collection of printables that are geared to support kids in learning. Kids can also hop on their favorite shows such as Wild Kratts and Dinosaur Train, where games are designed to enrich their education.

## [Sesame Street](#)

With a mission to help kids meet critical early development needs — the program many of us grew up on is still going strong and providing online content and shows every weekday morning. Many parents will attest that Sesame Street is still one of the best resources for the pre-k and kindergarten set, as well as kids with special needs. You'll find video, games, and art projects online. You may be home stuck with the kids, but we won't tell anyone when you jump up when "Number of the Day" comes up.

## [DuckDuckMoose](#)

If you're looking for some apps for the tablet, we recommend Duckduckmoose for the preschool to kindergarten set. Graphics and interface are engaging and easily accessible for children. From puzzles, maps, to fun music apps where you can learn notes and rhythm, kids gravitate enthusiastically to this sister site of [Khan Academy](#).

## [Metkids](#)

We recommend this resource for kids ages 5 and up. An extensive catalog of content, as well as a tool to partake in a virtual tour of the museum, will give kids a dose of art and culture. Kids can learn about a particular period or collection and explore art via the "Time Machine," starting as early as 8000-2000 BC to present time with fun facts and videos.

## [ProjectGutenberg](#)

A free library of over 60,000 free eBooks that include a children's literature category where kids can download or read online classics like [Little Women](#) and [Peter Pan](#).

## [Coolmath4kids](#)

Coolmath4kids is for kids from kindergarten to sixth grade. Kids can work on addition, subtraction, multiplication, division, and fractions through online math

games, quizzes, manipulatives, and more. For kids 13 and up, visit their sister site at [coolmath.com](http://coolmath.com).

## **Scholastic**

From [Smile](#) to [Dogman](#), Scholastic provides many favorite books to our kids. Students can visit the Scholastic website for a wealth of educational activities from grades pre-k and up. Weaving in familiar stories and games for the kids will help when the fun of being home has worn off, and delving into some familiar characters will add a bit of normalcy to the day.
